1.0 NOR WEB APPLICATION MODULES

1.1 Online data access and Remote data capture

1. Each SDP is given right to access its own data and is able to enter data remotely at its site via the NOR Web Application.

1.2 Real time report

Reports are generated on a real time basis based on data entered via the online data access and Remote data capture module.

1.3 Data Standard

These documents contain definition of all variables collected in all the NOR registries

1.4 Maintenance

This module allows user to change their password. Users are responsible to change their passwords every time they expire.

1.5 Access Control

Only authorized users can gain access to a system. Depending on the role of user, different users have different access rights to the application, i.e. some may view data only but not edit data, some may view and edit data, etc. If the application is left idle for more than 45 minutes, the application will be logged off automatically.

2.0 SECURITY

Each authorised user is required to read through, understand and sign The Security Policy for NOR Web Application before being authorised to access the application. This is to ensure that users play an active role in ensuring security of data at their level.

2.1 Policies and Practices as follows

As a good security practice, you are <u>strongly advised</u> to:

Keep your password confidential!

- **Avoid** sharing or divulging your Password to anyone. This includes any person who may appear to represent or work for the Registry. Our administrator do not request for your password at any time.
- **Avoid** using the same Web Application Password for any other web-based services such as for e-mail or for Internet Service Provider login.
- **Avoid** choosing a Password that is easily anticipated by a third party, like your NRIC number, telephone number, date of birth, etc. You should select a unique Password to make it difficult for anyone to anticipate.
- **Avoid** writing down or "saving" your Password on your browser or any other software. Memorizes your Password.
- If you suspect your Password may have been compromised, change your Password **<u>immediately</u>**.

Tips: *Your password is what tells the system that you are who you say you are. Because your password is like a key to your account, you need to safeguard it. Anyone who has your password can pose as you. Therefore, you may be held responsible for someone else's actions, if they are able to get your password. Do not record your passwords down, memorise them!*

Ensure you are accessing the correct website!

Never access the website via a hyperlink from an e-mail. Always enter the correct website address yourself, which is https://www.macr.org.my/eNOR/.

Only access Web Application using a secure and trusted computer!

- **Never** access your Web Application on computers / devices which you have doubts with regard to security, such as those located in public places. If you have to use such computers (for example, when you are outside the office), change your password once you have access to a secure computer.
- Keep your operating system (eg. Microsoft Windows) and Internet-related software updated with the latest security patches.
- Protect your computer from viruses and malicious programs with anti-virus software and firewalls where possible. Always update your anti-virus software with the latest virus signatures.
- Always log out your Internet session by clicking on the "logout" button whenever you leave your computer, even for a short while. Do not simply close the browser window when you wish to end the Web Application session.

2.2 Access group and Access Right for NOR users

Welcome to ACRM
The ACRM (Association of Clinical Registries, Malaysia) was established for the purpose of facilitating the set up and maintenance of clinical registries and databases in the country. Registry databases include information concerning demographics, diagnosis, treatment history and outcomes. A variety of output can be generated from the information collected.
In Malaysia however, there have been a lot of debatable issues surrounding clinical databases. The common problem seems to be in terms of collecting and sharing the data as well as database maintenance. Most institutions collect data for their own use. The majority of them have reservations with regards to data sharing even if it is for a common good. This is due to lack of clear policies on data sharing. These issues will remain unresolved unless measures are taken. Thus spelling the need to standardize (in both content and quality) and share databases.
This association was established to meet to those needs. It will be used as a platform to set up and maintain clinical databases for key diseases in Malaysia. It also aims to be the one stop portal where users can have access; physically and virtually to majority of clinical databases in Malaysia.
Register with us!
If you are currently involved or maybe planning to set up a clinical register or maybe interested in clinical databases, please send us an email at: contact@acrm.org.my
We also welcome participation from both individuals as well as organizations keen to link up with us!
Sign up as ACRM member today !!

Confidentiality Statement
You are about to gain access to the National Obstetric Registry (NOR) Web Application. By proceeding, you are agreeing to maintain the confidentiality of all information made available to you through this application. Any unauthorized access, use and/or disclosure of information shall be construed under the laws of Malaysia, and any action instituted pursuant to the terms of the Confidential Rule Agreement, as set forth in the Governance Manual of the NOR, shall be brought in the Court of Malaysia. Actions may include but not limited to loss of access privileges, an action for civil damages, an action for criminal charges, and/or disciplinary action including but not limited to suspension or dismissal.
The security of your data is of utmost concern to us. We practice strong security measures to prevent unauthorised access and interference of transactions and data. Read more about our policies and practices.
Please key in the authentication code that has just been sent to you via SMS.

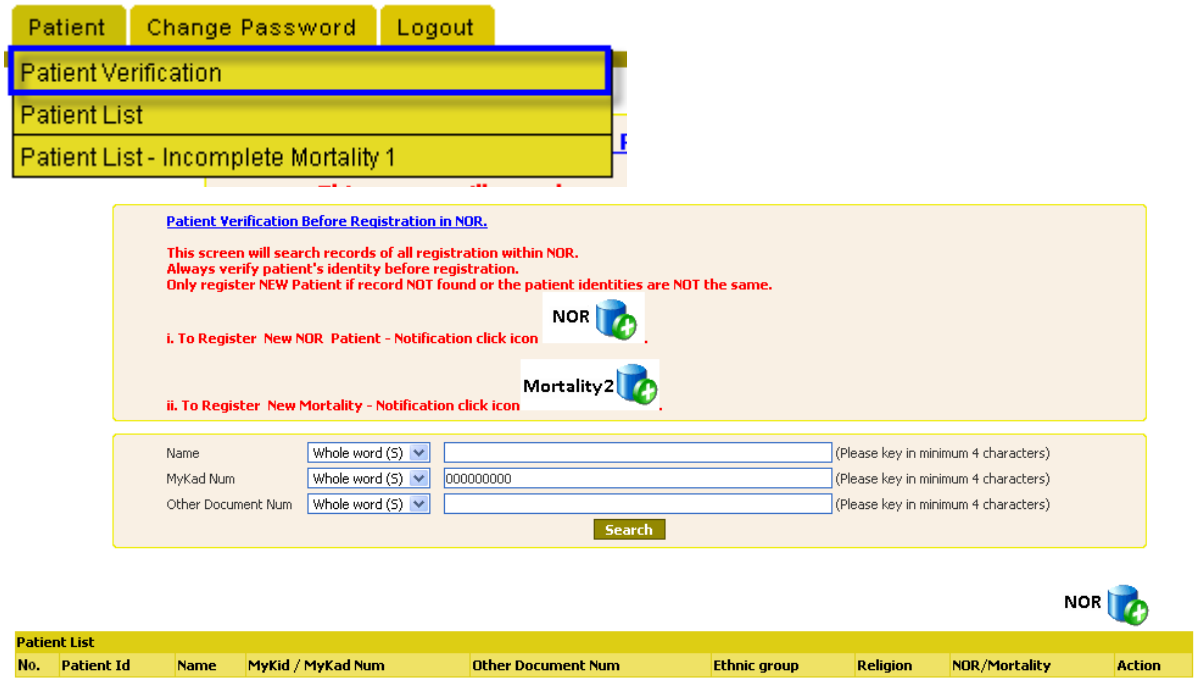
4.1.2 Patients Verification before Registration

Before registering a patient, please verify that patient has not been registered in the system before by clicking on Patient → Patient Verification

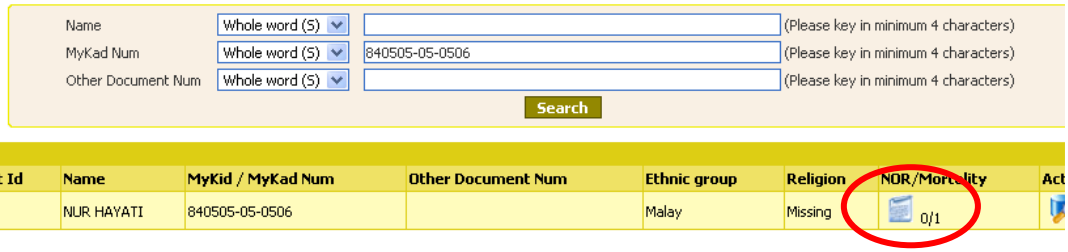


Picture 1.5 Patient List / Search Page

In the 'Verification' section, search the patient by type in either the Name, or MyKad Num or Other Document Num of the patient.

4.1.3 Register NOR Patient Notification

If the patient exists in the database (i.e. Patient is shown in the patient list), click on NOR button of the patient to view the list of notification for that patient.



If patient doesn't exist (i.e. Patient is NOT shown in the patient list), click on the blue icon NOR in Picture 1.5 to register a new patient.

After click on blue icon, user will be brought to Mother National Obstetrics Registry Form as shown in Picture 1.6.

The Mother National Obstetrics Registry Form consists of 7 different sections that need to be filled in.

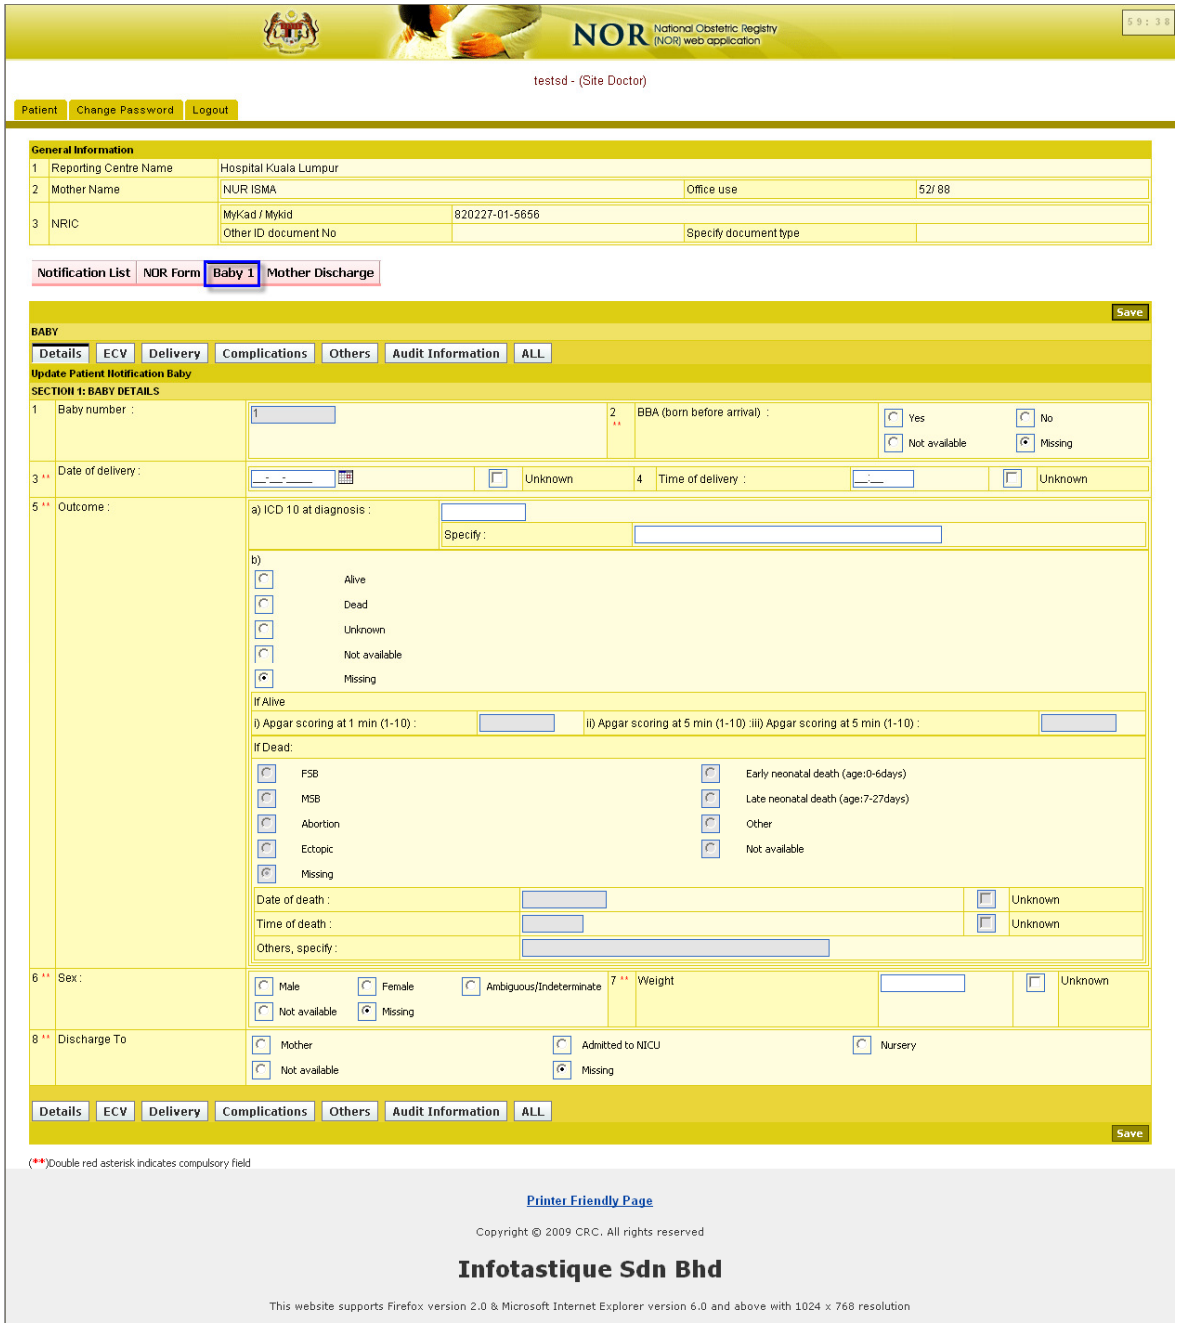
Note: Please be informed that field with ** symbols are mandatory field.

Picture 1.6 *Mother National Obstetrics Registry Form*

After completed the form, click on the Save button to save the data into the database

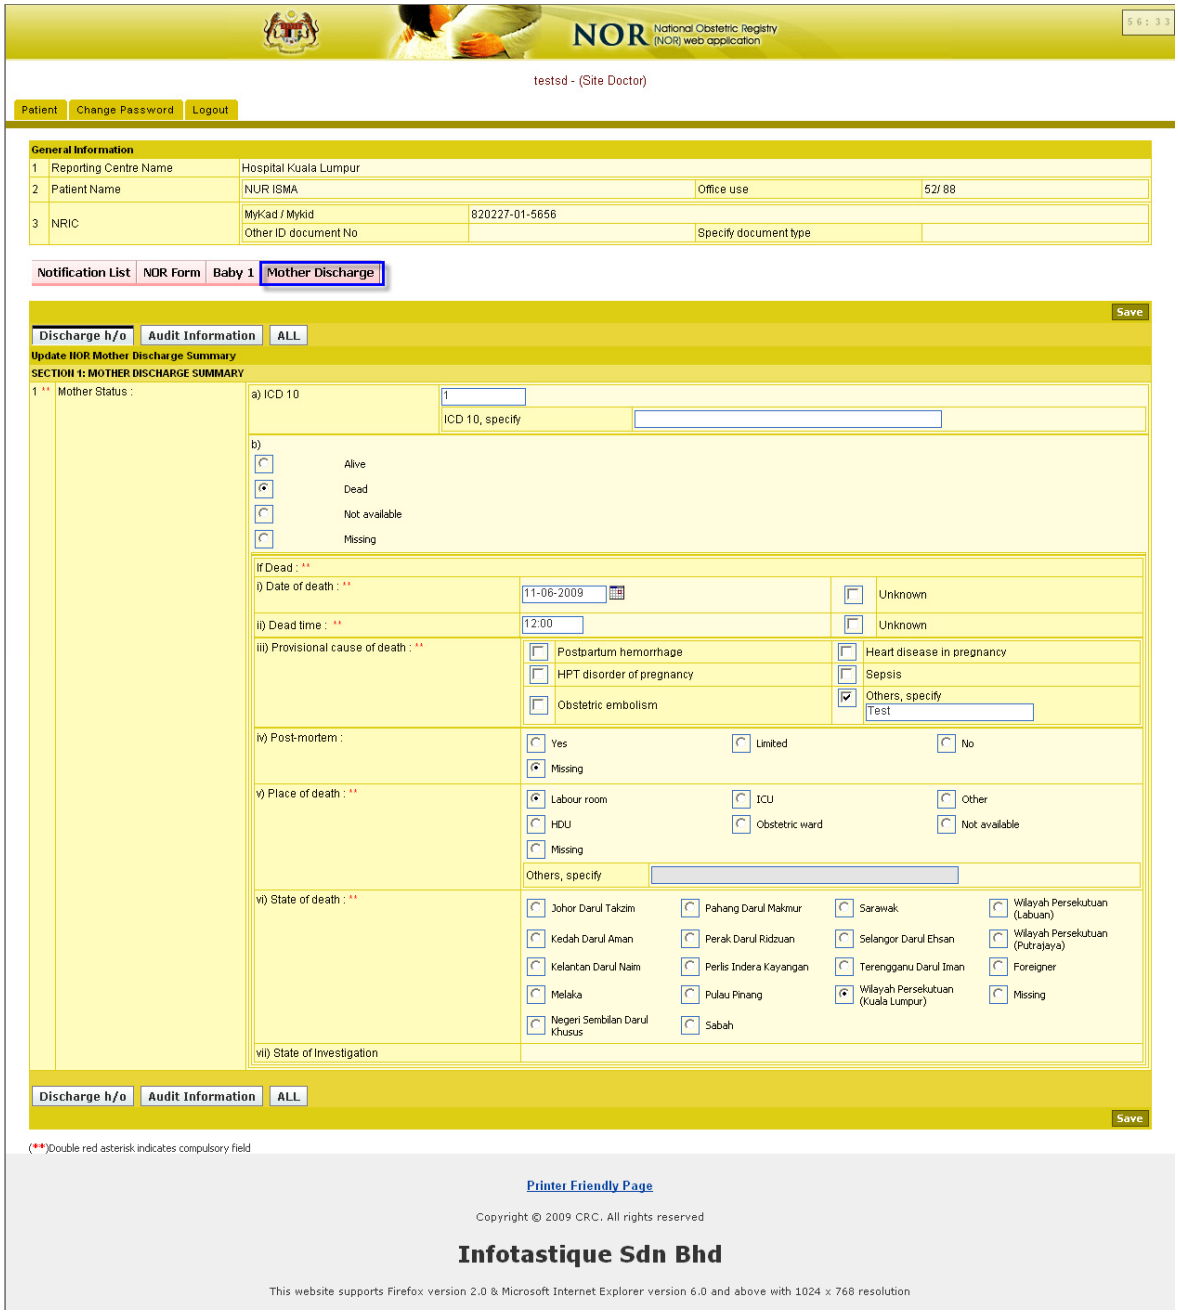
After saving Mother National Obstetrics Registry Form the page will automatically go to Baby Form as shown in Picture 1.7. The number of Baby pages to enter depends on the number of fetuses in Mother National Obstetrics Registry Form, Section 5: Patient (Mother) Admission Details No .2

The Baby Form consists of 5 different sections that need to be filled in.



Picture 1.7 *Baby National Obstetrics Registry Form*

After saving Baby National Obstetrics Registry Form the page will automatically go to Mother Discharge Summary Form as shown in Picture 1.8.



Picture 1.8 *Mother Discharge Summary*

After completion all of the form, click on the

button and the patient would appear in the NOR Notification List as shown in Picture 1.9.

Picture 1.9 *NOR Notification Form List*

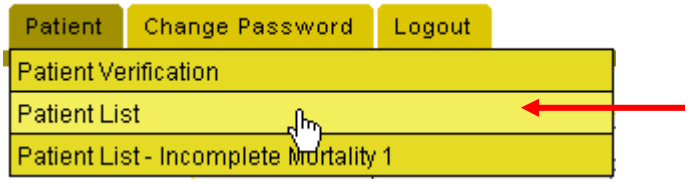
To view patient's information entered in NOR Notification form, click on the blue View icon on NOR Notification List.

To update the patient's information in NOR Notification form, click on the blue Update icon on NOR Notification List.

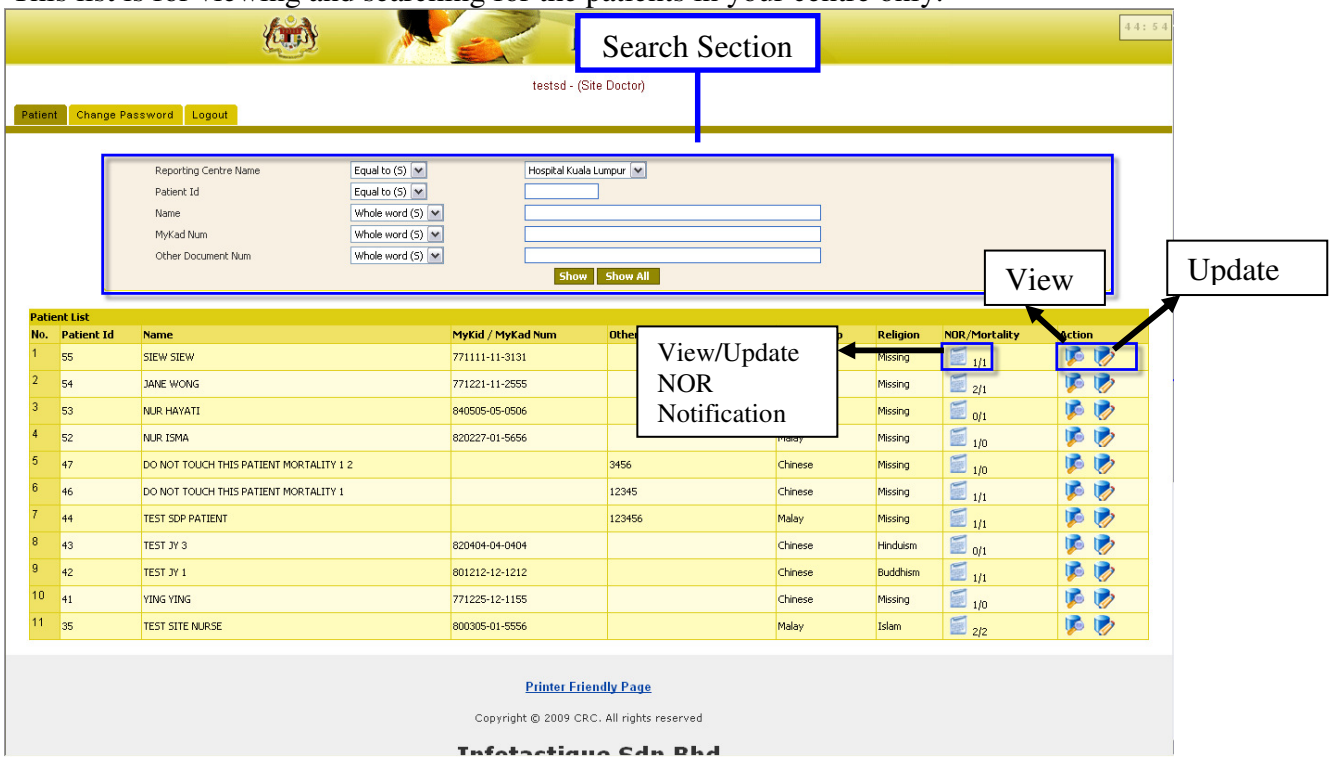
To delete a patient's NOR record, click on the blue request delete icon on NOR Notification List.

4.1.4 Patient List

To search for a patient, select 'Patient List' under the 'Patient' toolbar.



In the 'Search' section (Picture 1.10) search the patient by filling in the selection criteria. This list is for viewing and searching for the patients in your centre only.



Picture 1.10 *Patient List / Search page*

To View Patient Particulars, click on the blue View icon

To update the patient's form, click on the blue Update icon .

To View/Update NOR Notification data, click on the NOR Notification icon

4.2 Change Password

To change the password, click on the 'Change Password' menu toolbar, fill in the details as below and click the Submit button.

5.1.2 Patients Verification before Registration

Before registering a patient mortality, please verity that patient has not been registered in the system before by clicking on Patient → Patient Verification.

Picture 1.16 *Patient List / Search Page*

In the 'Verification' section, search the patient by type in either the Name, or MyKad Num or Other Document Num of the patient.

The Mortality form is divided into Mortality 1 and Mortality 2 form.

Mortality 1 is for patients who died in the state hospital during antenatal and immediate post natal period and have existing NOR form. Mortality 1 form will have data that is prefilled from NOR form. Mortality 1 form can only be filled up AFTER NOR form is filled.

Mortality 2 is for patients who did not die in the state hospital during antenatal period and immediate post natal period.

5.1.3 Register Patient Without NOR Notification Information - Mortality 2

If the patient does not exist in the database (i.e. patient is not shown in Patient List), click on blue Mortality 2 button

in Picture 1.16

After click on blue icon, user will be brought to NOR Patient Mortality Details Form as shown in Picture 1.17

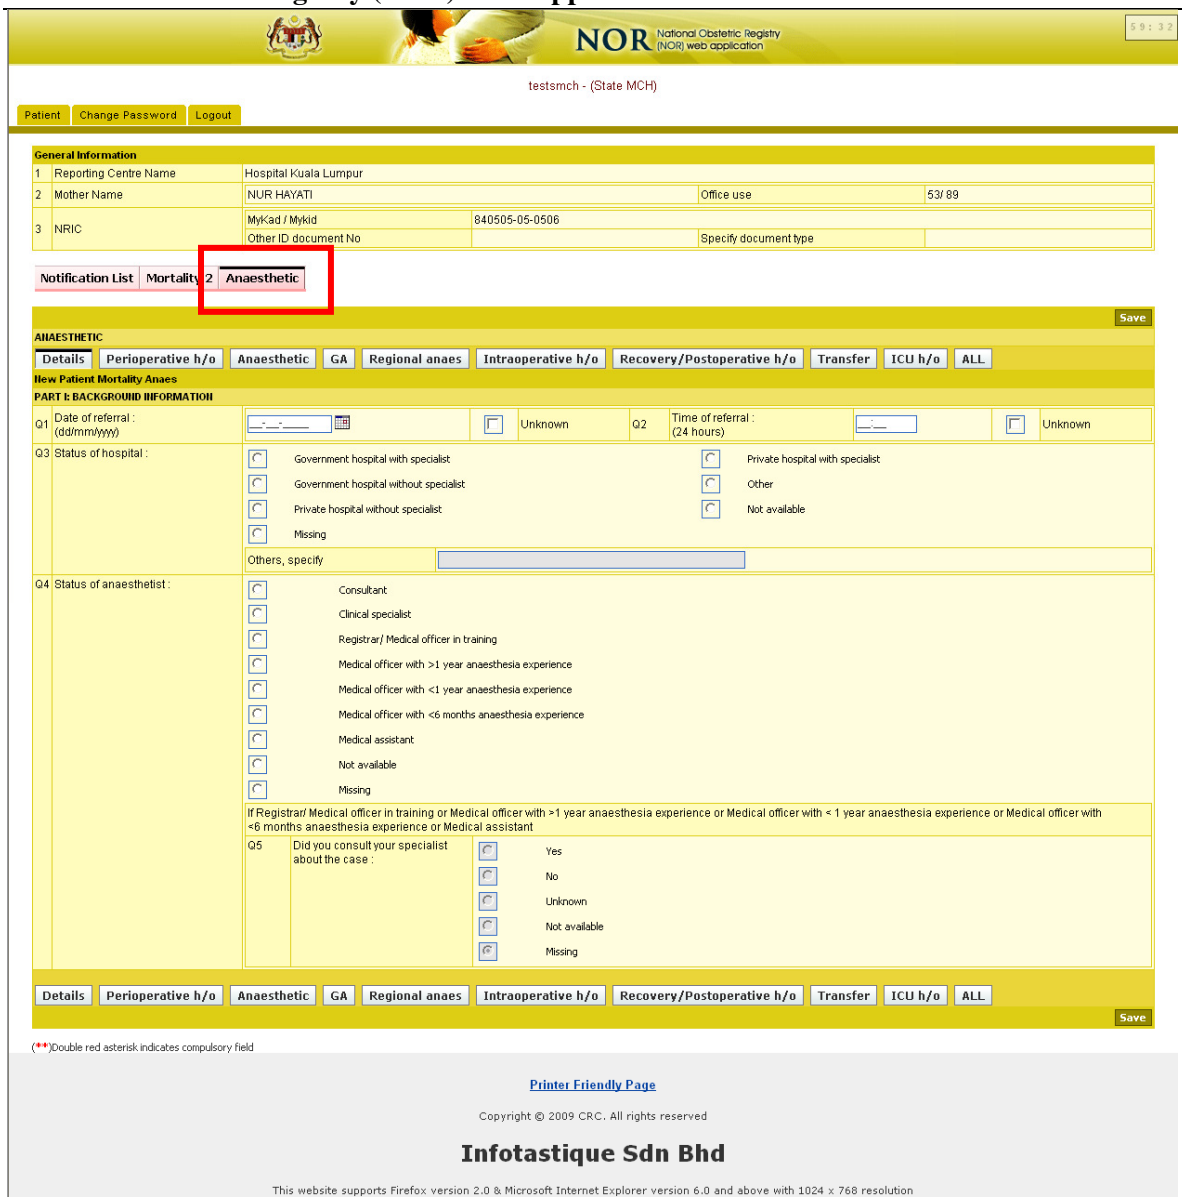
Picture 1.17 *NOR Patient Mortality Details Form*

Note: Please be informed that field with ** symbols are mandatory field and # symbols is for autofill from NOR form (Applicable for Mortality I).

The NOR Patient Mortality Details form consists of 8 different sections that need to be filled in.

After completed the form, click on the

button to save the data into the database and the page will automatically go to Patient Mortality Anaesthetic Form as shown in Picture 1.19.



Picture 1.19 *Patient Mortality Anaesthetic Form*

The Patient Mortality Anaesthetic form consists of 9 different sections that need to be filled in.

After completed the form, click on the

button and the patient would appear in the NOR/Mortality Notification List as shown in Picture 1.20.

Picture 1.20 *NOR / Mortality Notification List*

To view patient's mortality 2 information entered in NOR Mortality form, click on the blue View icon on NOR Notification List.

To update the patient's mortality 2 information in NOR Mortality form, click on the blue Update icon on NOR Notification List.

To request delete a patient's Mortality 2 record, click on the blue request delete icon on NOR Mortality List.

5.1.4 Register Patient With NOR Notification Information - Mortality 1

If the patient exist in the database (i.e. Patient is shown in Patient List), click Mortality icon  in Picture 1.21 of the patient to view the list of Mortality notification for the patient.

Picture 1.21 *Patient List / Search page*

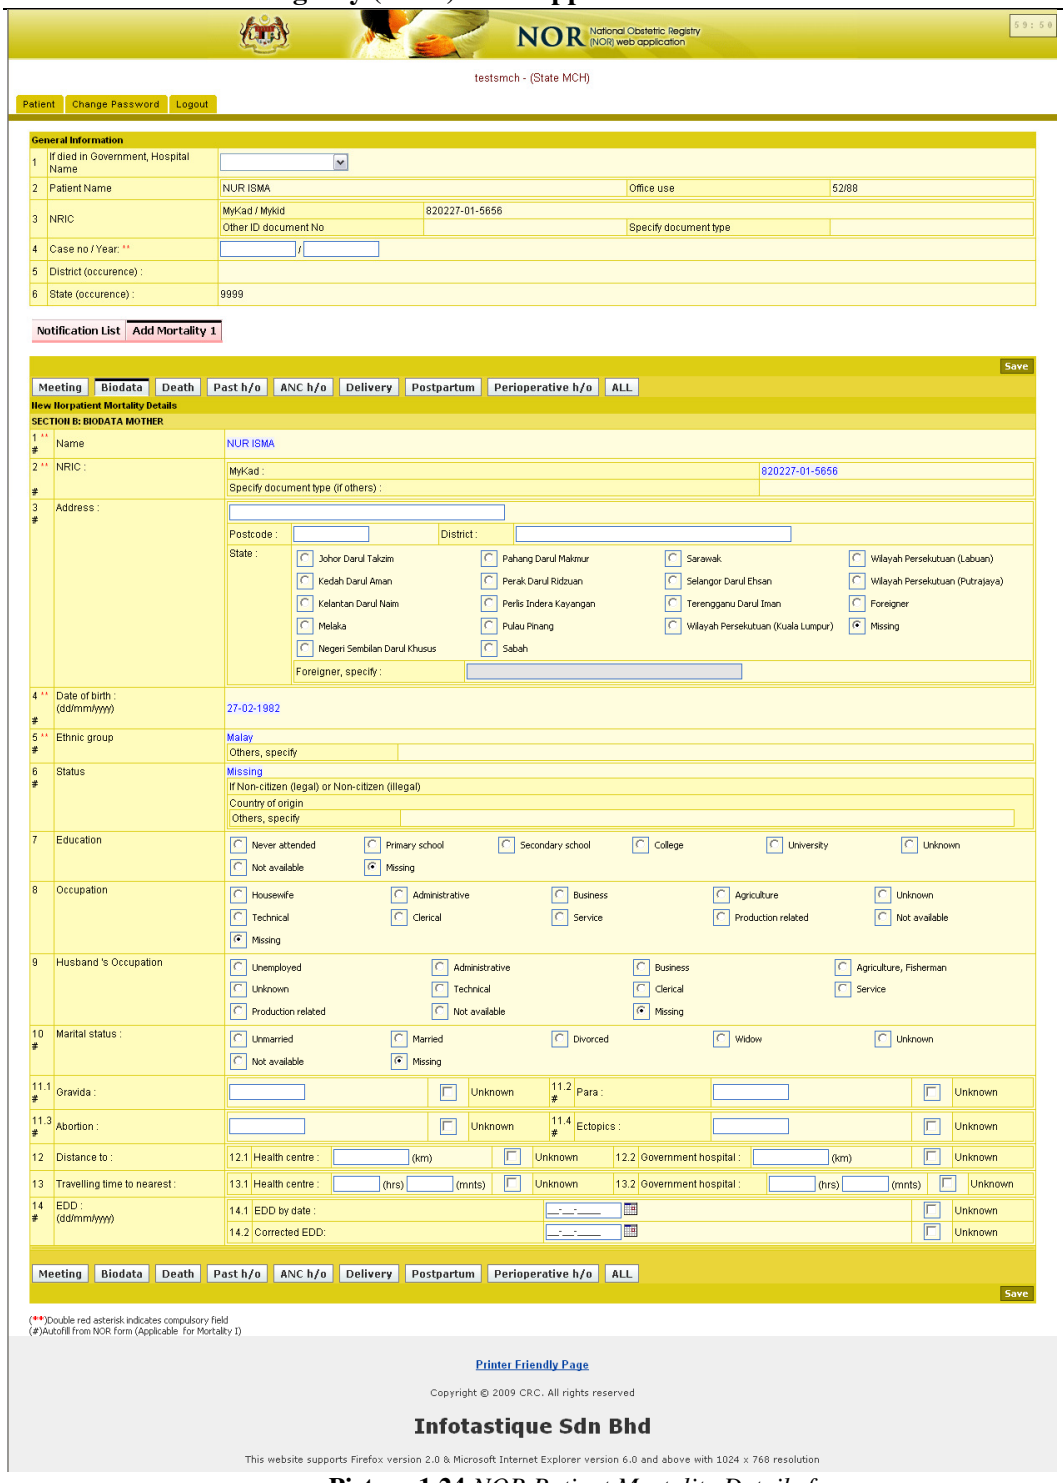
After clicking the  icon, user will be brought to Mortality Notification List as shown in Picture 1.22.

Picture 1.22 *NOR/Mortality Notification List page*

To add Mortality 1 form click icon 
in NOR/Mortality Notification List. User will be brought to NOR Patient Mortality Details form as show in Picture 1.23.

Picture 1.23 *NOR Patient Mortality Details form*

The NOR Patient Mortality Details form consists of 8 different sections that need to be filled in.



Picture 1.24 *NOR Patient Mortality Details form*

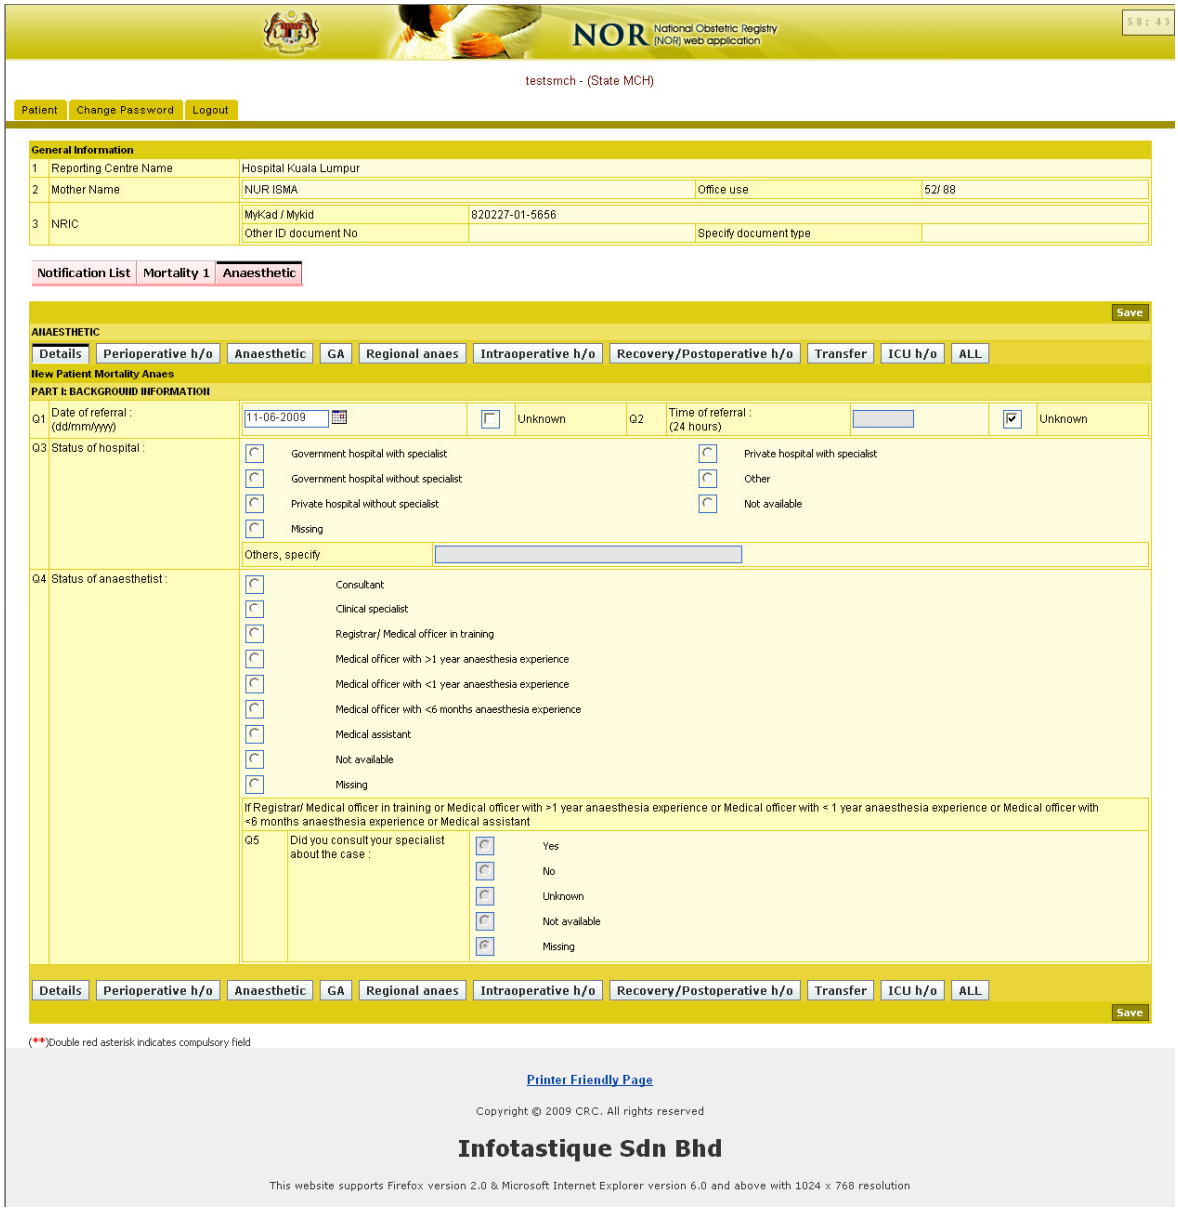
Please be informed that field with ** symbols are mandatory field and # symbols is for autofill from NOR form (Applicable for Mortality I) as show in Picture 1.24.

After completed the form, click on the

button to save the data into the database.

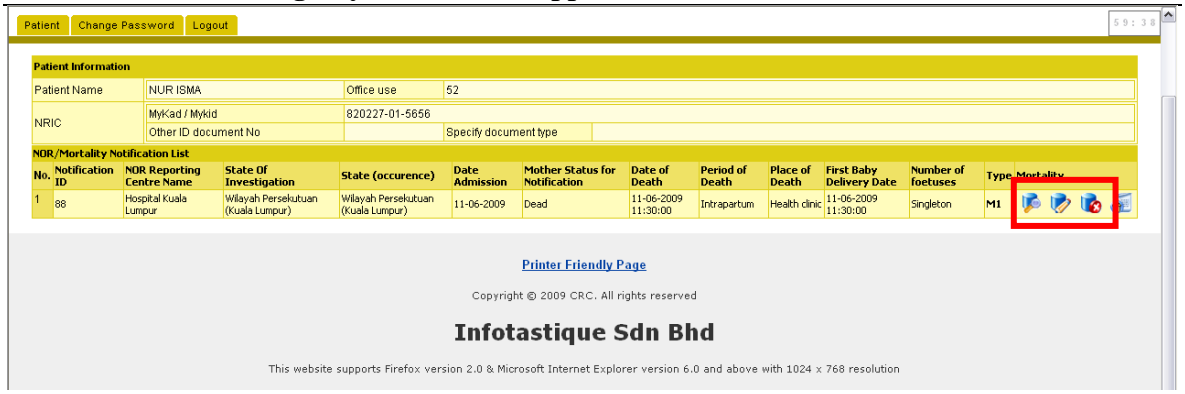
The page will automatically go to Patient Mortality Anaesthetic Form as shown in Picture 1.25.

The Patient Mortality Anaesthetic form consists of 9 different sections that need to be filled in.



Picture 1.25 *Patient Mortality Anaesthetic Form*

After completed the form, click on the Save button and the patient would appear in the NOR/Mortality Notification List as shown in Picture 1.26.



Picture 1.26 *NOR / Mortality Notification List*

To view patient's Mortality 1information entered in NOR Mortality form, click on the blue View icon on NOR/Mortality Notification List.

To update the patient's Mortality 1information in NOR Mortality form, click on the blue Update icon on NOR/Mortality Notification List.

To request delete a patient's Mortality 1 record, click on the blue request delete icon on NOR/Mortality Notification List.

5.1.5 Patient List
